The game installed and runs fine, no issues My concern is that when I start the game, it asks for my Product Key every stinkin' time! I have uninstalled, done a check of the registry, all the little tweaks and tricks that I know and have read about regarding issues like this, but nothing works.

I know it is an old game and might not be a big deal to some, but this is a Microsoft product running on a Microsoft operating system; one would think that they run right! I have read about several instances of games and even Microsoft apps asking repeatedly for Product Keys, so I know this is not an isolated problem.. Any help would be appreciated Moved from: Windows/ Gaming on Windows 10 [Unduhan Gagal Di Uc Browser Firefox Cara Menyambung](#)
